

GL ShipManager

Interested in optimizing your materials management, saving money and reducing workload?

Procurement

- Order Management
- Redelivery
- Stock Control / Inventory
- Budget
- Consumption
- Catalogs (Interface: ISSA, IMPA, etc.)
- Provisions
- Shipyard Tender

GL ShipManager – Procurement streamlines the complete scope of maritime procurement activities and provides more trans-parency in a shipping company's purchasing and materials management processes. Intelligent synchronization and processing of data between the board and office systems ensures that users of the system onboard and in the office have access to the same information, subject to user rights configurations. The purchasing needs of all vessels managed by the system, regardless of their geographical location, are efficiently and easily managed.

The system delivers on-demand access to key business data regarding suppliers, prices, order and delivery history, budgets, equipment and stock levels. Symbols and a user-definable color coding system provide an easy overview of the status of ordered items during all stages of the cycle, from initial requisitioning through to the confirmation of delivery and approval of invoice.

A detailed hierarchy of equipment, spare parts and other consumables, as well as an interface to catalogs (ISSA, IMPA, etc.) enables purchase orders or supplier inquiries to be initiated with just a few simple clicks.

Increase speed

- of decision making with on-demand access to key business data
- of order processing from the initial onboard requisitioning of materials to the initiation of purchase orders with just a few simple clicks

Increase efficiency

- of fleet-wide purchasing processes
- of logistics and materials management processes
- of workflow due to automation of tasks and minimized manual data entry

Increase transparency

- of budgets per vessel and committed expenses
- of purchasing activities and the status of ordered items from the initial request through to the confirmation of delivery and approval of invoice
- of stock levels
