

GL ShipManager

Setting the new benchmark for fleet management software

GL ShipManager is a modular based software tool that functions as a base platform for operations and allows for its implementation according to the individual needs of the shipping company. This flexible approach enables the customer to quickly reap immediate benefits while ensuring that future needs will be accommodated as they arise.

Each module of GL ShipManager offers significant benefits to streamline workflow. Implemented as a complete suite, GL ShipManager is an integrated information system that simplifies data management between office and ship, providing increased efficiency and productivity over the whole value chain.

All essential processes of administrative and operational ship / fleet management are represented in GL ShipManager's easy-to-use modules.
